

Remarks

Responsive to the action mailed August 22, 2007, applicants elect, without traverse, the invention of Group X drawn to a chimeric NgR1 protein comprising the MAG binding motif of NgR2. In the August 22, 2007 action, Group X was stated to correspond to claims 36-41 and 50-51. However, claims 36-37 are cancelled herein without prejudice. Thus, claims 38-41 and 50-51 fall within Group X. Claims 40 and 41 are amended herein to recite chimeric protein rather than chimera. This amendment is not intended to limit the claim further and is simply made to correct a typographical error. Support for these amendments can be found throughout the specification and the claims as originally filed.
